Paper No(s)/Mail Date <u>020904</u> .	6)	_·	

- 1. Applicant's election of Species V, claim 4, in the reply filed on 04/13/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1, 5, 6, 7, and 13 are considered generic and therefore included in the elected species V for action on merits. Claims 2, 3 and 9-12 are withdrawn from consideration. An action on merits including 1, 4-7 and 13 is as follows.
- 2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first coating (as recited claim 1) and second coating (as recited claim 13) must be shown. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

Page 3

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Use of the term "in particular of the type...." at several occurrences renders the claim vague since scope of the claim can not be ascertained precisely.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Juestel et al (USPgPub 2002/0105266).

Juestel et al disclose applicant's claimed light-emitting device (Figure 1), having at least one radiation source (3), which emits essentially within the range of from 150 to 600 nm, and a luminescent material (4; paragraph 0020, 0031) which converts the light from the light source at least partially into longer-wave radiation, the luminescent material being formed by particles which are coated by a coating layer (at least paragraph 0007-0010).

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1, 5, 13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Juestel et al, as applied to claim 7.

As to claim 1, 5 and 13, Juestel et al do not disclose coating of the phosphor having certain thickness, as claimed by applicant. However, it would have been obvious to one of ordinary skill in the art to choose thickness of the phosphor coating in a suitable range, since it has been held that where general conditions of the claim are discovered in the prior art, discovering the optimum or workable range involves only routine skill in the art. In re Aller, 105 USPQ 233.

As to claim 16, Juestel et al do not disclose the phosphor having a second coating, as claimed by applicant. However, providing additional coating would have been obvious to one of ordinary skill in the art for enhancing overall coating function of the phosphor so as to prolong the lifetime of the phosphor.

In light of this, it would have been obvious to one of ordinary skill in the art to modify Juestel et al's light-emitting device and include the second coating for enhancing

overall coating function of the phosphor so as to prolong the lifetime of the phosphor.

8. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior art of the record does not disclose applicant's claimed light-emitting device of entire claim 1, wherein the coating material is selected from at least one of the group, as specifically recited in claim 4.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ellens et al and Braune et al each are cited for showing general structure of a lighting device including a phosphor material.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok Patel whose telephone number is 571-272-2456. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel can be reached on 571-272-2457. The fax phone number for the
